

Small-sized, battery-powered tire inflator featuring LED flashlight.

TELESTAR TROTTY PUMP is a small-sized electric tire inflator featuring digital controls, useful additional functions and a wide range of accessories. The powerful compressor generates a max. pressure of 120 PSI (8 bar) with an air flow of 20l/min. Five preset modes allow, in combination with the accessories, a versatile use of TROTTY PUMP (e.g. to inflate car, motorcycle or bicycle tires as well as balls or swimming rings). TROTTY PUMP's internal, rechargeable 7.4V battery is fully charged in a few hours. Besides its main function, the TROTTY PUMP may be used as a flashlight. Thanks to its small dimensions and weight, the tire inflator is easy to carry, a transportation bag is included in the accessories.

Highlights

- Small-sized, battery-powered tire inflator featuring a wide range of accessories and useful additional functions
- Easy, intuitive control via buttons and display
- 5 preset modes for different types of usage (customizeable)
- Pressure 120 PSI (8 bar) max., flow 20l/min, pressure accuracy +/- 1 PSI
